

2.1 Environmental Policy Statement

Redwood (the Organisation) recognises the importance of environmental protection and is committed to operating its business responsibly and in accordance with all environment regulations, legislation and approved professional codes of practice relating to communication agency activities. We will endeavour to make this an on-going process of improvements to both goods and service provided and must include internal housekeeping.

At Redwood we are committed to the prevention of pollution and reducing our effect on the environment related to both the supply chain management of all of our products and in our office management. In order to strive towards meeting this commitment we will:

- meet all necessary legislative, regulatory and consent requirements which relate to our business,
- keep informed of environmental issues and, in particular, those which are of direct relevance to our business,
- continue to raise the awareness of all our employees, the effect of their actions on the environment, and their responsibility to the environment; by communication, discussion and training encourage all our employees to apply good environmental practice, both at work and at home.
- minimise our environmental impact by the operation of suitable waste minimisation and recycling schemes.
- manage our building and grounds in an environmentally sensitive manner,
- make use of, wherever practicable, best environmental practice when planning and developing new and existing operations,
- operate a thoughtful purchasing policy by selecting wherever practical, materials and services which are less damaging to the environment,
- set environmental objectives and targets based on continual improvement, monitor results and review on a regular basis at management meetings,
- establish and maintain an Environmental Management System which continually reduces waste, effluent, emissions and the use of scarce resources,
- Implement and maintain “chain of custody” for PEFC / FSC certified material assigned across all of our projects.

This policy is communicated to all employees, suppliers and sub-contractors and is made available to all interested parties, via its website and upon request. All personnel understand their obligations under this policy statement, and abide with the principles and contents of the Environmental management System manual. The Organisation constantly monitors and reviews its environmental performance and this Environmental Policy Statement is in place to ensure its continuing sustainability, and will implement appropriate improvements.

Signed,

Keith Grainger - Chief Executive
